DETAILED ACTION

Allowable Subject Matter

1. Claims 1-11 are allowed.
2. The following is an examiner's statement of reasons for allowance: None of the prior art of record teaches an image forming apparatus having a developing device comprising a rotary developer carrier facing a latent image carrier for carrying a developer comprising a toner and a carrier; a rotary developer supply and collection member for supplying the developer to and collecting from the developer carrier; a first rotary developer stirring member for stirring the developer while conveying and circulating the developer; a second rotary developer stirring member for stirring the developer while conveying and circulating the developer between the first and second developer stirring members, wherein the developer carrier, the developer supply and collection member, the first developer stirring member and the second developer stirring member are arranged in a housing in parallel with each other order in a direction leaving the latent image carrier, and wherein conveyance directions of the developer of the first and second developer stirring members are opposite to each other with respect to rotary axis directions thereof, and conveyance power for the developer thereof substantially identical to each other; a third rotary developer stirring member for stirring the developer, having a length in a rotary axis direction smaller than that of the second developer stirring member and a conveyance power for the developer in a rotary the second developer stirring axis direction that is substantially zero, provided facing the second developer stirring member at a position corresponding to an upstream portion of

and farther than the second developer stirring member in the housing; and a toner replenishment inlet through which a new replenished, provided in the housing at an upper toner position of a part where circumferential surfaces of the second and third developer stirring members face each other, and on an upstream side developer of the second developer stirring member, wherein the third developer stirring member rotated so that the circumferential surface thereof moves downward in the same direction as that of the circumferential surface the second developer stirring member at the position where the circumferential surfaces of the second and third the conveyance direction of the developer stirring members face each other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Inquiry

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kikuta et al, Sato, Sugimoto, and Sakai et al, disclose other structures of a developing device used in image forming apparatus.
